

BBO Basket Blasters

- Automate Finishing of Small Parts
- Process 15 Pounds of Parts per Cycle
- Conserve Space and Capital

Electric Timer controls the duration of blast cycles up to 60 minutes.

Dust Collector with cartridge filter assures clean, efficient operation.

Solenoid Valve shuts down blasting automatically at the completion of preset cycle.

Door Interlock conforms with OSHA.

Pressure Regulator with Gauge facilitates blast pressure adjustments for optimum finishing results.

Moisture Separator removes oil and condensate from supply lines.

Removable, Perforated Basket rotates to expose all sides of parts to the blast stream.

BBO Basket Blaster Specifications

Basket:	9 inch x 9 inch, 1/16" perforated metal, removable
Construction:	All welded, 16 gauge
Motor:	115 Volts, 60 Hertz, 1 Phase, .01 hp, 7 RPM, Fixed
Electric Timer:	Maximum cycle: 60 minutes
Dust Collectors:	BBO-1: Dry filter dust bag, 1 amp BBO-2: DC-16 with blower and cartridge filter, 8 amp
Load Capacity:	15 pounds maximum
Shipping Weights:	BBO-1: 100 pounds, BBO-2: 130 pounds
Air Requirements:	10 SCFM at 60 psi using standard 3/32" air jet
Standard Features:	• Air gauge • Pressure regulator • Moisture separator
Options:	• Blow-off gun • PVC-coated basket

If you're looking for a fast, efficient, economical method for finishing small parts, check out one of Empire's BBO Basket Blasters. To finish parts, you simply drop them into the BBO's nine-inch by nine-inch basket, set the time, and let these table-top work savers do the rest. As parts rotate through an abrasive blast stream, they are cleaned, peened or finished evenly and automatically. By varying air pressure and abrasive media, you control the type of finish as well as required processing times.

Beyond freeing you from the tedious chore of processing parts manually, Empire's BBO Basket Blasters save you time and money in other ways. They are inexpensive, come fully assembled and ready to operate, require only a

two-horsepower compressor, use less electricity than a 150-watt light bulb, and meet OSHA requirements.

BBO Basket Blasters come in two OSHA compliant models: a BBO-1 with dust bag, and a BBO-2 with a cartridge dust collection system that provides cleaner, more efficient operation. Both Basket Blasters are recommended for applications where blasting is performed two to three hours per day.

For additional information about our BBO Basket Blasters, contact Empire or your local Empire distributor, and visit our web site at www.empire-airblast.com
